1 Original Zünd accessories – the benefits

For us, perfection is about fulfilling our customers' wishes. Whatever the application, you will find the right tool in our Accessories Product Catalogue. Our customers' feedback on our 10,000+ installed systems is constantly being incorporated in the initial and further development of our accessories. This is how we ensure that our products constantly remain at the highest level. We always take note of requirements arising from the application of our systems by our customers, and these are constantly incorporated into the range in the form of new or improved products.

As a quality-conscious customer, you benefit from this commitment by being able to make optimum use of your Zünd cutter in terms of productivity and quality.

Rapid availability of high quality replacement parts is a decisive factor in daily operations. Only a manufacturer with a worldwide presence like Zünd can supply original accessories in such little time on a global scale. And if you don't have a catalogue to hand, you can also find all our accessories online at: www.zund.com.

1.1 Warranty limitation

The type of tool used for any given operation can greatly affect cut quality. Forces and vibrations that occur during processing reduce both the life-cycle of tools (EOT, POT, PRT, DRT, URT etc.) and the cut quality.

The combination of Zünd cutters, Zünd tools and Zünd original accessories is the result of many years' intensive development work. This includes continuous input from our customers and their applications. Zünd reserves the right to refuse warranty claims for defects in Zünd cutters caused by the use of non-original Zünd accessories.

2 Blades

2.1 General information

2.1.1 Benefits at a glance

Zünd offers a broad range of quality blades, specially adapted to your cutting system and suitable for all your needs. This enables you to achieve a consistently high quality standard throughout the entire production process. Zünd blades are developed and manufactured specially by experts to meet market requirements.

Zünd blades offer crucial benefits:

- An excellent cutting result
- Low levels of waste/scrap
- Higher capacity utilization and shorter order times thanks to fewer blade changes
- We use only high performance materials
- Our quality remains constant

Original Zünd quality

Zünd blades are produced to the highest quality standards. All Zünd blades are recognizable through the Zünd quality seal with which they are engraved.

- 1 Zünd quality seal
- 2 Batch number
- 3 Blade name

2.1.2 Blade material

The material the blades are made from plays a major role with regard to the stability and the life expectancy of the blade. Zünd blades are made from carbide or high speed steel. Carbide blades have a significantly higher life expectancy than high speed steel blades, but high speed steel blades are much less susceptible to impacts and vibrations that can cause the tips to break.

Tip!

Never touch carbide blades or bring them into contact with hard objects.

The benefits of Zünd carbide blades:

- Longer life expectancy than high speed steel.
- Greater productivity thanks to fewer blade changes.
- Better cutting quality thanks to the blade's precision finish and very high stability.

Your Zünd service partners will be pleased to help you choose the best blade for your needs.

2.1.3 Blade shape and dimensions

Zünd blades are specifically designed and sharpened to handle a wide range of materials. The additional specifications provided for each blade contain a list of the materials for which it can be used.

Cutting angle

The cutting angle has a major influence on the cutting force. With drag blades, a narrow cutting angle means smaller drag forces.

However, this has the disadvantage of creating a larger overcut.

2.1.4 Maximum cutting depth

There is a specified maximum cutting depth for each blade, which is determined by the length of the cutting edge. The cutting depth which can be achieved depends greatly on the Type of material. The cutting depth of some oscillating blades will be reduced when using the glide shoe. Please remember to factor in the set depth as well as the material thickness.

2.1.5 Ovcut x

The pre-cut: x_1 is the distance from the centre of the axis of rotation to the first point where the cutting edge cuts the material surface in the direction of travel. The Post-cut: x_2 is the measurement from the centre of the axis of rotation to the last point where the cutting edge cuts the material surface.

The cutting angle has the greatest influence on processing quality. A narrower cutting angle may enable faster cutting, but it also produces a greater overcut. A narrower cutting angle can be used for paths that include large curves and long straight sections.

Tip!

The overcut distorts the cutting contours. For cuts with a low margin of error, Zünd recommends choosing a blade with a smaller overcut. Overcut information can be found in the additional specifications for each blade.

2.1.6 Calculating the overcut

Depending on the cutting depth, the blade geometry will produce a different level of overcut. This chapter explains how to calculate your overcut based on the blade you are using and the material you are cutting. The Z20 pointed oscillating blade and Z11 drag blade are used as examples here.

The cutting depth T_m is made up of the material thickness t and the set depth z . Insert these values into the formula as they are listed in the product description for each blade. The result will be the pre-cut:/post-cut: in mm.

Example Z20

Example Z11

Sample calculation Z20**Formula** $x = 1.2 + 0.11 \times Tm$ **Cutting depth** $Tm = 10.2 \text{ mm}$ **Pre-cut:** $x_1 = 2.322 \text{ mm}$ **Sample calculation Z11****Formula** $x_{1,2} = 0.58 \times Tm$ **Cutting depth** $Tm = 5.2 \text{ mm}$ **Pre-cut:** $x_1 = 3.016 \text{ mm}$ **Post-cut:** $x_2 = 3.016 \text{ mm}$ **2.1.7 Blade Types**

Depending on which tool they are used in, a distinction is made between the following blade Types:

- **Drag blades:** used in non-powered tools such as UCT, KCT, VCT, SCT, C2, insert sleeve 40)
- **Oscillating blades:** used in EOT/POT oscillating tools
- **Rotary blade:** decagonal (ten-sided) blades for DRT/PRT tools

Drag blades

Drag knives are used in combination with non-powered tools (UCT, KCT, VCT, SCT, C2).

Round-stock blade
(e.g. Z1)

Flat-stock blade
(e.g. Z10)

Mat-cutting blade
(e.g. Z34)

V-cut blade
(e.g. Z70)

- Maximum cutting speed; cheap to purchase and maintain
- High cutting force
- Particularly suitable for foils, paper, thin folding carton, banners, etc.
- Most cost-effective cutting option, as the purchase price for the associated tools (UCT, KCT, VCT, SCT, C2) is considerably lower than those for powered tools.

Oscillating blades

The oscillating tool is mostly recommended for cutting thick and tough materials. The oscillating motion of the blade decreases the drag force exerted on the material in the direction of travel. However, to achieve this, the feed speed must be precisely adjusted to suit the selected oscillating blade and oscillation frequency. Choosing the right oscillating blade depends primarily on the contour to be cut:

- Zünd recommends flat blades for large radii, straight and large parts.
- Very sharp, pointed blades should only be used to cut small radii. The feed speed must be reduced to achieve a good quality cut.

Flat blade (e.g. Z43)

- High cutting speed
- Large radii, straight and/or large parts

Pointed blade (e.g. Z20)

- Low cutting speed
- Small radii and/or small parts

Rotary blade**Decagonal (ten-sided) blades**

- Very high cutting speed
- Suitable for large radii, straight and/or large parts
- Recommended for breathable materials such as textile, carbon fibre, glass fibre, etc.
- Very large overcut

2.2 Overview of blades

2.2.1 Drag blades

Round-stock blades (C2, C2P, KCT, KCM-S)

2.3 Product description

Z1

Item no.: 3910105

Type

Round-stock drag blade

Technical information

Pre-cut: 1.43 x Tm

Post-cut: -

Max. cutting depth: 1.0 mm

Blade material: Carbide

Properties

Blade for cutting any standard self-adhesive vinyls.

Recommended materials

- Self-adhesive vinyls
- Masking film
- Cardstock
- Pattern materials

Intended use

KCT,
Insert sleeve 40
for vinyl blades

C2, C2P

KCM-S

Z2

Item no.: 3910110

Type

Round-stock drag blade

Technical information

Pre-cut: 1.43 x Tm

Post-cut: -

Max. cutting depth: 1.0 mm

Blade material: Carbide

Properties

Blade for cutting any standard self-adhesive vinyls. Similar to the Z1, but exerts less drag force and has a shorter life expectancy.

Recommended materials

- Reflective vinyls
- Self-adhesive vinyls
- Masking film
- Cardstock
- Pattern materials

Intended use

KCT,
Insert sleeve 40
for vinyl blades

C2, C2P

KCM-S

Z3**Item no.:** 3910115**Type**

Round-stock drag blade

Technical information

Pre-cut: 1.43 x Tm

Post-cut: 1.43 x Tm

Max. cutting depth: 1.0 mm

Blade material: Carbide

Properties

Fine blade for creating small lettering.

Stable and long-life double-edged blade.

Recommended materials

- Self-adhesive vinyls
- Masking film

**Intended use**

KCT,
Insert sleeve 40
for vinyl blades

C2, C2P

KCM-S

Z4**Item no.:** 3910116**Type**

Round-stock drag blade

Technical information

Pre-cut: 0.7 x Tm

Post-cut: -

Max. cutting depth: 2.1 mm

Blade material: Carbide

PropertiesFine blade tip with small overcut;
therefore somewhat less stable.**Recommended materials**

- Sandblast vinyls
- Reflective vinyls
- Cardstock
- Pattern materials

**Intended use**

KCT,
Insert sleeve 40
for vinyl blades

C2, C2P

KCM-S

W6

Item no.: 3910154

Type

Round-stock drag blade

Technical information

Pre-cut: 1.73 x Tm

Post-cut: -

Max. cutting depth: 2.4 mm

Blade material: Carbide

Properties

Robust all-round blade which exerts little drag force for large radii.

Recommended materials

- Paper
- Cardstock
- Tarpaulin material
- Plastic film

Z5

Item no.: 3910117

Type

Round-stock drag blade

Technical information

Pre-cut: 0.58 x Tm

Post-cut: -

Max. cutting depth: 2.6 mm

Blade material: Carbide

Properties

Very small overcut for vinyls and soft materials.

Recommended materials

- Sandblast vinyls
- Reflective vinyls
- Cardstock
- Pattern materials

Intended use

KCT,
Insert sleeve 40
for vinyl blades

C2, C2P

KCM-S

Intended use

KCT,
Insert sleeve 40
for vinyl blades

C2, C2P

KCM-S

Z6**Item no.:** 5223298**Type**

Round-stock drag blade

Technical information

Pre-cut: 1. x Tm

Post-cut: -

Max. cutting depth: 1.5 mm

Blade material: Carbide

Properties

Blade for cutting any standard self-adhesive vinyls. Sturdy and stable knife.

Recommended materials

- Self-adhesive vinyls
- Magnetic vinyls
- Reflective vinyls
- Model box
- Polycarbonates
- Masking vinyls
- Stencil board
- Tarpaulin material

**Intended use**

KCT,
Insert sleeve 40
for vinyl blades

C2, C2P

KCM-S

Z7**Item no.:** 5224068**Type**

Round-stock drag blade

Technical information

Pre-cut: -0.03+0.7 x Tm

Post-cut: 0.1 mm

Max. cutting depth: 2.1 mm

Blade material: Carbide

Properties

Blade for cutting any standard self-adhesive vinyls in thru-cut application. Sturdy and stable knife.

Recommended materials

- Self-adhesive vinyls
- Magnetic vinyls
- Reflective vinyls
- Model box
- Polycarbonates
- Masking vinyls
- Stencil board
- Tarpaulin material

**Intended use**

KCT,
Insert sleeve 40
for vinyl blades

C2, C2P

KCM-S

Z10

Item no.: 3910301

Type

Flat-stock drag blade

Technical information

Pre-cut: 0.84 x Tm
 Post-cut: 0.84 x Tm
 Max. cutting depth: 4.8 mm
 Blade thickness: 1.5 mm
 Blade material: Carbide

Properties

Stable and robust double-edged drag blade. Similar to Z11, but with a larger overcut and longer life expectancy.

Recommended materials

- Tarpaulin material
- PVC banners (frontlit/backlit)
- Polypropylene; PP
- Polyester fabric; coated textiles
- Polycarbonate; PC
- Folding carton; 100 - 1500 g
- Vinyl
- Hard foam core

**Intended use**

UCT,
 Insert sleeve 40 +
 blade holder type 1
 (3960322)

SCT +
 blade holder type 1
 (3960322)

Z11

Item no.: 3910309

Type

Flat-stock drag blade

Technical information

Pre-cut: 0.58 x Tm
 Post-cut: 0.58 x Tm
 Max. cutting depth: 6.9 mm
 Blade thickness: 1.5 mm
 Blade material: Carbide

Properties

Double-edged blade with universal applications. Similar to Z10, but with a smaller overcut and shorter life expectancy.

Recommended materials

- Tarpaulin material
- PVC banners (frontlit/backlit)
- Polypropylene; PP
- Polyester fabric; coated textiles
- Polycarbonate; PC
- Folding carton; 100 - 1500 g
- Vinyl
- Hard foam core

**Intended use**

UCT,
 Insert sleeve 40 +
 blade holder type 1
 (3960322)

SCT +
 blade holder type 1
 (3960322)

Blades

Z83

Blades

Z101

Z83**Item no.:** 5206878**Type**

Flat-stock drag blade

Technical information

Pre-cut: 0.84 x Tm
 Post-cut: 0.84 x Tm
 Max. cutting depth: 4.6 mm
 Blade thickness: 1.5 mm
 Blade material: Carbide

Properties

Centric, asymmetrical drag blade for ridgefree inside cutting edge.

Recommended materials

- PVC
- Polycarbonate; PC
- Folding carton
- Hard foam core

**Z101****Item no.:** 5217696**Type**

Flat-stock drag blade

Technical information

Pre-cut: 0.58 x Tm
 Post-cut: 0.58 x Tm
 Max. cutting depth: 6.8 mm
 Blade thickness: 1.5 mm
 Blade material: Carbide

Properties

Centric, asymmetrical drag blade for ridgefree inside cutting edge.

Recommended materials

- PVC
- Polycarbonate; PC
- Polypropylene; PP
- Folding Carton
- Hardfoam
- Magnetic foil

**Intended use**

UCT,
 Insert sleeve 40 +
 blade holder type 1
 (3960322)

Oscillating blade – pointed

Properties

Blade for cutting thin materials. The overcut is smaller, but the blade exerts more drag force on the material than the Z16. For best results, use as an oscillating blade.

Recommended materials

- Magnetic material
- Polycarbonate; PC
- Polyester film
- Coating blanket
- Paper; 100 - 400 g
- Folding carton; 100 - 1500 g

Technical information

Pre-cut: 0.47 x Tm
Post-cut: -
Max. cutting depth: 12 mm
Blade thickness: 0.63 mm
Blade material: Carbide

**Z44**

Item no.: 3910340

Type

Flat-stock drag blade

Properties

Double-sided blade for less tough, fibrous materials. This blade offers similar properties to Z11.

Recommended materials

- Carpet
- Tarpaulin material

**Intended use**

UCT,
Insert sleeve
40 +
blade holder
type 3
(3960324)

Z22

Item no.: 3910315

Type

Oscillating blade – pointed

Properties

Fine, robust blade with low overcut; designed to cut small radii and intricate detail.
Similar to Z20, but more robust and with a larger overcut.

Recommended materials

- Corrugated cardboard; B, C, BC, EB and E flute
- Light foam core
- Foam
- Folding carton; 100 - 1500 g
- Polyester fabric; coated textiles
- Rubber, ejection rubber
- Magnetic material
- Corrugated plastic
- Felt

Technical information

Pre-cut: 1.2 + 0.2 x Tm
Post-cut: -
Max. cutting depth: 14 mm
Blade thickness: 0.63 mm
Blade material: Carbide

**Z20**

Item no.: 3910313

Type

Oscillating blade – pointed

Properties

Very fine, delicate blade with minimal overcut; designed to cut small radii and intricate detail.

Recommended materials

- Corrugated cardboard; B, C, BC, EB and E flute
- Folding carton; 100 - 1500 g
- Light foam core
- Foam
- Ejection rubber
- Felt

**Intended use****Intended use**

Z60

Item no.: 5201345

Type

Oscillating blade – pointed

Properties

Strong blade for tough materials; similar to Z21.

Recommended materials

- Saddle leather, leather
- Rubber
- Corrugated plastic

Technical information

Pre-cut: 2.2 + 0.15 x Tm
 Post-cut: -
 Max. cutting depth: 16.5 mm
 Blade thickness: 1.5 mm
 Blade material: Carbide

**Z21**

Item no.: 3910314

Type

Oscillating blade – pointed

Properties

Fine blade with low overcut; designed to cut small radii and intricate detail.

Technical information

Pre-cut: 1.6 + 0.11 x Tm
 Post-cut: -
 Max. cutting depth: 17.2 mm
 Blade thickness: 0.63 mm
 Blade material: Carbide

Blade for sandwich materials

**Recommended materials**

- Sandwich board
- Corrugated cardboard
- Corrugated plastic

Intended use

EOT-250

POT,
 blade holder
 1.5 mm

Z607**Item no.:** 5210317**Type**

Oscillating blade – flat

PropertiesOscillating blade for soft foam up to 54 mm thickness and < 45 kg/m³**Recommended materials**

- Foam

Technical information

Pre-cut: 3.8 + 0.03 x Tm
 Post-cut: -
 Max. cutting depth: 56 mm
 Blade thickness: 1.5 mm
 Blade material: HSS

**Z64****Item no.:** 5002739**Type**

Oscillating blade – flat

Technical information

Pre-cut: 3.5 + 0.03 x Tm
 Post-cut: -
 Max. cutting depth: 57 mm
 Blade thickness: 1.5 mm
 Blade material: HSS

PropertiesCost-effective blade for soft, thick materials.
Short life expectancy!**Recommended materials**

- Foam
- Insulating mat

Intended use

EOT-250

POT,
blade holder

Item no.: 5232250

Type

Oscillating knife - flat

Properties

Oscillating knife for materials up to 54 mm thickness

Recommended materials

- Foam
- Insulating mat
- Corrugated cardboard

Technical information

Pre-cut: $3.76 + 0.03 \times T_m$
 Post-cut: -
 Max. cutting depth: 56 mm
 Blade thickness: 1.5 mm
 Blade material: HM

**Blades**

Z104c

Z104c

Item no.: 5230655

Type

Carbide, drag/oscillating knife, coated

Technical information

Pre-cut: $1.4 + 0.18 \times T_m$
 Post-cut: -
 Max. cutting depth: 11 mm
 Blade thickness: 0.63 mm
 Blade material: HM/Carbide

**Properties**

Coated knife for corrugated board up to 7 mm thickness

Recommended materials

- Corrugated board

Intended use

EOT-250

Z206c

Z206c**Item no.:** 5230653**Type**

Carbide, oscillating knife, coated

Technical information

Pre-cut: 1.24 + 0.18 x Tm
 Post-cut: -
 Max. cutting depth: 11 mm
 Blade thickness: 0.63 mm
 Blade material: HM/Carbide

Properties

Coated, pointed blade with small overcut for cutting small radii or small details

Recommended materials

- Corrugated board

**Blades**

Z53

Z53**Item no.:** 4800059**Type**

Rotary blade

Technical information

Max. cutting depth: 2.0 mm
 Blade thickness: 0.6 mm
 Blade material: Carbide

**Properties**

Driven round-knife for cutting of single-layer textiles.

Recommended materials

- Aramid fibre
- Glass fibre
- Single-layer textiles
- Textiles

Intended use

PRT

Z50**Item no.:** 3910335**Type**

Rotary blade

Properties

Decagonal (10-sided) blade similar to Z51/
Z52, but with smaller overcut and greater
cutting force.

Recommended materials

- Textiles
- Technical textiles
- Carbon fibre
- Glass fibre
- Aramid fibre

Technical information

Max. cutting depth: 3.5 mm
Blade thickness: 0.6 mm
Blade material: Carbide

**Z51****Item no.:** 3910336**Type**

Rotary blade

Technical information

Max. cutting depth: 5.0 mm
Blade thickness: 0.6 mm
Blade material: Carbide

Properties

Decagonal (10-sided) blade.

Recommended materials

- Textiles
- Technical textiles
- Carbon fibre
- Glass fibre
- Aramid fibre

**Intended use**

DRT

PRT

Intended use

DRT

PRT

Z52

Item no.: 3910337

Type

Rotary blade

Properties

Decagonal (10-sided) blade similar to Z50/
Z51, but with larger overcut and lower
cutting force.

Recommended materials

- Textiles
- Technical textiles
- Carbon fibre
- Glass fibre
- Aramid fibre

Technical information

Max. cutting depth: 7.0 mm
Blade thickness: 0.6 mm
Blade material: Carbide

**Z55**

Item no.: 5205751

Type

Wheel knife

Properties

Only use with a special PU cutting underlay.

Recommended materials

- Technical textiles (PES, PVC, etc.)
- Carbon fibre
- Glass fibre

Technical information

Max. cutting depth: 1 mm (single-layer)
Blade thickness: 0.3 mm
Blade material: HSS

**Intended use**

DRT

PRT

Intended use

WKT

	5211032	Clamping pin for pneumatic collet, Ø 6.0 mm
	5812569	Cylindric wiper, Ø 6.0 mm
	5812831	Cylindric wiper, Ø 8.0 mm
	5812821	Conical cleaner
	5813295	Cone cleaner for motor spindle

Routing accessories

Collets, 1 kW milling spindle, QC

Figure	Item no.	Description
	5210057	Router bit holder silver, Ø 9.0 mm, (ARC RM-A QC)
	5210058	Router bit holder black, Ø 10.5 mm, (ARC RM-A QC)
	5210059	Router bit holder red, Ø 10.0 mm, (ARC RM-A QC)
	5212478	Router bit holder, (ARC HSK RM-L)

10 Plotting accessories

10.1 Insert sleeves, cartridges/cartridge holders

Figure	Item no.	Description
	3910223	Insert sleeve for long-life cartridge (Super Giant)
	3910222	Insert sleeve for silver cartridge
	3205430	Insert sleeve for edding 400/404 (permanent marker)
	5202649	Insert sleeve for edding 1880/140s
	3910200	Insert sleeve for ballpoint cartridge

10.2 Cartridges

Figure	Item no.	Item
	3910201	Ballpoint cartridge black
	3910202	Ballpoint cartridge blue
	3910203	Ballpoint cartridge green
	3910204	Ballpoint cartridge red
	3910224	Long-life cartridge black (Super Giant)
	3910205	Ballpoint cartridge silver

Insert sleeves, cartridges/cartridge holders

11 Cutting and routing underlays

**Cutting underlay PLP (anthracite)**

Standard board for cutter models without material transport. Due to the max. raw material size of 1500 x 1000 mm, larger cutting areas must be covered with multiple elements.

Thickness: 2.5 mm

**Cutting underlay S (anthracite)**

Underlay from the same material as models with material transport (conveyor belt). The polyester non-woven material (PET) reinforced with textile fabric is available in one piece for all cutting area sizes.

Thickness: 2.8 mm

**Cutting underlay ST (brown)**

Thin cutting underlay, primarily used for cutting through in vinyl cutting solutions. Facilitates an optimized cutting edge and clean, defined baseline when using recorders.

Max. available width 1800 mm.

Thickness: 1.0 mm

**PU cutting underlay coated (red)**

Cutting underlay with a thick PU layer for the cutting process using a wheel knife tool (WKT). Vacuum adhesion is not possible because it is airtight.

PU layer: 2.0 mm.

Total thickness: 5.1 mm

**Sealgrip routing underlay**

The dark gray Sealgrip routing underlay is best suited for the precise production of small parts and fixes the material during the routing process. This routing underlay is harder, has better vacuum properties and the adhesion of small parts is secured.

Material dimension 1000 x 1600 mm – also available as 1 x 30 m roll material.

Thickness: 2.0 mm

**Sealgrip W routing underlay**

The light gray Sealgrip W routing underlay fixes larger cut parts during the routing process. It is less expensive, softer and has a lower vacuum, which is why this carpet pad is only suitable for large cut parts.

Material width 1530 mm

Thickness: 2.0 mm

11.1 Bulk materials

Item no.	Item
2500200	Cutting underlay PLP (anthracite), 2.5 mm, 1500 x 1000 mm
2500201	Cutting underlay ST (brown), 1.0 mm, 1800 x 20000 mm

11.2 Sealgrip routing underlay

Item no.	Item
5200362	Sealgrip routing underlay, 1000 x 1600 mm
3912208	Sealgrip routing underlay, 1 m x 30 m roll

11.3 Sealgrip W routing underlay

Item no.	Item
5217164	Sealgrip W routing underlay, 1530 mm x 2500 mm
5217165	Sealgrip W routing underlay, 1530 mm x 3200 mm
5217163	Sealgrip W routing underlay, 1.53 m x 60 m roll
