

DRAWTO

Drawing Tool

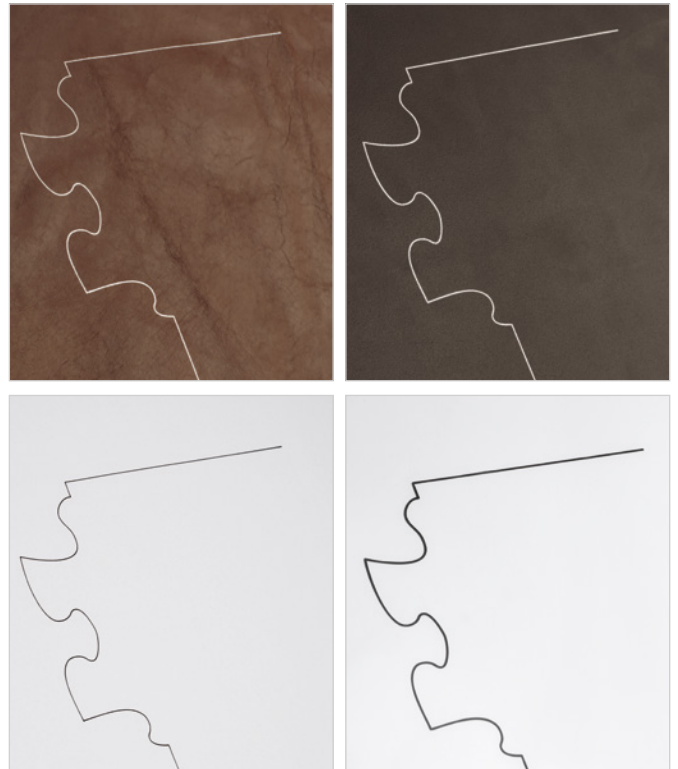

DRAWTO is a cost-effective tool for precise marking and drawing on textiles, leather, rubber or Teflon.

A wide range of materials can be easily marked up using this drawing tool. DRAWTO is a very economical tool since it uses readily available inserts such as ballpoint or felt-tip

pens in various line widths. It is mainly used to produce patterns in the textile and leather industries.

Assembly marks, dashed lines and text can all be drawn with this tool. DRAWTO is not intended for marking finished products.
