

UNITO C | E

Universal Cutting Tool

The Universal Cutting Tool is capable of processing (via Thru Cut) many different types of materials precisely and efficiently.

UNITO is suitable for through-cutting and scoring a wide range of materials. Zünd recommends the use of this tool especially for processing cardboard and different types of film.

The use of drag knives makes it possible to achieve very high processing speeds. In addition, the UNITO purchase and maintenance costs are significantly lower than those of motordriven tools.

To cut through the material, UNITO also has a spring-loaded glide shoe (included with the tool). The exact cutting depth is set via Zünd Cut Center – ZCC.

Details

Max. material thickness: 5 mm | 0.2 in

Available in three variants:

- Unito C-15 (for centered knives 1.5 mm thick)
- Unito E-6 (for off-centered knives 0.63 mm thick)
- Unito E-15 (for off-centered knives 1.5 mm thick)

Compatible with Q-Line

Benefits at a glance

Universal cutting tool for an extremely wide range of materials

Very high cutting speeds

Wide range of drag knives available on [myZund](#)

Fully supported by Zünd Cut Center – ZCC
