

Kiss-Cut Tool – KCT

Product Information

Perfect cutting depth is essential for any vinyl application, especially in kiss-cutting. The variable, adjustable pressure of the kiss-cut tool enables precise cutting of vinyl and film without damage to the liner material.

In addition to all standard vinyls and films up to 3 mm thick, the tool is also suitable for cutting thin paper and cardboard. A fixed glide shoe is included with the tool. It is used for through-cutting cardboard and Diamond

Grade vinyl. Whether you are producing standard shaped or custom stickers, where maintaining the integrity of the liner material is essential, or precision-cut decals and signage elements for visual branding – the

KCT delivers reliable precision and versatility needed for professional results across a range of cutting tasks.

Details

Two processing methods:

- Kiss-cutting
- Through-cutting

Max. material thickness: 3 mm

Precise depth control

Clean cuts make for easy separation
