

Electric Oscillating Tool – EOT-250

This Electric Oscillating Tool is a powerful tool for efficiently processing sandwich board/honeycomb materials, cardboard and tough leather.

Tough materials such as thick carton, sandwichboard/honeycomb and leather present a challenge for the cutter as well as the blade. The robust, air-cooled EOT-250 is up to the

task! With an extended, 2.5 mm stroke and high oscillating frequency, the EOT-250 is capable of processing such demanding materials at very high speeds.

Zünd offers a wide variety of oscillating blades compatible with this tool.

Details

Powerful electric drive.

Stroke: 2.5 mm

Compatible with 1.5 mm thick oscillating blades.
Knife holder with adapter for 0.63 mm blades available as option.

Air consumption: max. 70 l/min

Air pressure: 0.6 MPa

Compatible with **G3**, **S3**, **L3**, **D3**.

Advantages at a glance

Allows for very high processing speeds.

Ideal for cutting thick cardboard and leather materials.

Wide range of compatible flat/pointed oscillating blades available from Zünd.

Fully supported in Zünd Cut Center - ZCC.
