

Universal Drawing Tool – UDT

The Universal Drawing Tool is a cost-effective tool for precision marking/plotting on fabric, leather, rubber, Teflon, etc.

The Universal Drawing Tool can be used for easy marking/plotting on a variety of materials. The UDT is very cost-effective since it accommodates readily available, standard drawing/plotting tools such as felt-tip and

ballpoint pen cartridges available in various line widths.

The most common applications for the UDT are creating patterns and stencils in the leather and textile industries, where it is fre-

quently used for plotting assembly markers, pattern symbols, and text. Drawing/plotting is possible in any orientation. The UDT is not intended for labeling finished products.

Details

Insert for UM and UM-S modules

Compatible with **G3**, **S3**, **L3**, **D3**.

Advantages at a glance

Uses inexpensive standard cartridges

Easy cartridge change/replacement

Fully supported in Zünd Cut Center
